[P. 161-A]
162 slight excess of females in the composition of the population. He gives the following figures, evidently from a population of 411 adults.

	Children Per Cent	Adults Per Cent	Total Per Cent
Male	48.0	48.9	48.4
Female	52.0	51.1	51.6

[165] Infant mortality (32.7 per cent)
Average age 27–30
9 widowers among 201 men
9 widows among 210 women
14 polygamous families (3.1 per cent)

• 16 Demographic data for the Sua net hunters is [114] not available. Putnam kept detailed medical records for all members of the band for a decade, but many of these have been lost in the course of shipment to the United States, and the few that are available do not provide a [184] representative picture. From such data as are available, there does not seem, however, to be any significant difference between the two groups.
